## APPLICATIONS

## FEATURES

- ✓ Closed circuit system
- ✓ Easy to move and transport
- ✓ Quick and simple assembly
- ✓ No water waste
- ✓ No building permits required
- ✓ Environmentally friendly

A self-contained, environmentally friendly, cleaning system for construction plant and equipment. The wash bay is equipped with galvanized ramps and 87" mm high walls. The wash bay floor pan directs the dirty water and sludge from the equipment being cleaned to a solids collection tank at the rear of the wash bay. Inside the rear tank, a float switch activates a diaphragm pump which delivers the dirty water into the filtration tanks to start the filtration process. After the water has been through this process, a booster pump delivers the water again to your pressure washer. Through the filtering system, you can use the same water repeatedly. **The filters inside the separator tank can be easily replaced, guaranteeing an adequate filtering barrier.**

## Technical data

|                              |                              |
|------------------------------|------------------------------|
| Useful dimension             | 118" x 177"                  |
| Total dimension              | 141" x 227"                  |
| Filtration tank dimension    | (X-TECH-30) 111" x 30" x 40" |
| Maximum load capacity        | 11,023 lbs                   |
| Walls standard height        | 87"                          |
| Total dry weight of the bay  | 3,792 lbs                    |
| Diaphragm pump               | 54 kW, 5 gallons/min         |
| Booster pump                 | 37 kW, 1.3 to 11 gallons/min |
| Filtering system             | X-TECH-10                    |
| Option filtering system      | X-TECH-15 - 30 - 60          |
| Option maximum load capacity | 22,046 lbs                   |
