A self-contained, environmentally friendly, cleaning system for construction plant and equipment. It comes as standard with heavy duty automatic X-TECH-30 filtration systems. The wash bay is equipped with galvanized ramps and 87" high walls. The wash bay floor pan directs the dirty water and sludge from the equipment being cleaned to a solids collection tank at the rear of the wash bay. In this version the side collection tanks are substitute from a central collection tank. **The tank is 750 mm wide and collect mud, stones and debris from the lateral mounted modules.** The wide size allow customer to clean it using a little digger. Covering grid can be removed thanks to the kit of lifting hooks available with the system.

The central collection tank increase the net cleaning surface from 36 to 40,5 sqm and the dimension of the bay to 6 x 6,75m.
